

# The VitalConnect Solution

Shattering the paradigm of patient care as we know it today

By combining the most sophisticated biosensor with a pre-eminent platform, the VitalConnect® solution is enabling unprecedented insight into patient health and transforming the experience of both the patient and the healthcare providers.

The seamless feed of actionable data leads to timely analysis and empowers care givers to intervene immediately if necessary, saving lives, while also saving time and money. We are extending the reach of health management as never before.

## Connecting with those who need to stay connected

VitalConnect's focus is on helping healthcare organizations to remain "always connected" with their patients, leveraging real-time connectivity and instant feedback to provide immediate response when needed.

<b>HOSPITAL MONITORING</b>	<b>Keeping healthcare professionals informed</b>	 Identify patients at risk and intervene before it's too late	 Hands off continuous monitoring allows the patient to rest and recover faster	 Track biometric trends to enable predictions that lead to a better outcome
<b>POST DISCHARGE MONITORING</b>	<b>Keeping the connection alive</b>	Identify patients who need earlier intervention	Improve patient recovery time	Reduce hospital readmissions
<b>REMOTE PATIENT MONITORING</b>	<b>Giving patients confidence with continuity</b>	Remotely identify patients at risk for deterioration	Enable prioritization of the patient population	Prevent hospital admissions
<b>CLINICAL TRIALS</b>	<b>Allowing research and development to fail faster</b>	Deeper insight into safety and efficacy	Gather rich streams of objective data	Improve study design through remote access to data

# The VitalPatch

The world's leading clinical-grade wearable biosensor

Single-Lead ECG

Heart Rate

Heart Rate Variability

Respiratory Rate

Skin Temperature

Body Posture

Fall Detection

Activity

The VitalPatch® biosensor continuously monitors eight vital signs in real time - never before has such a small, elegant device provided so much valuable information for health-care professionals. The lightweight and comfortable design ensures compliance so patients can be monitored around the clock and across care settings. Data can be streamed to a mobile device or server, enabling care that can extend beyond the walls of the hospital.

## Simple design, seamless connectivity

### DATA | Continuous and real-time

- 8 biometric measurements
- Validated accuracy compared to SOC measurement
- ECG electrodes to detect heart rate
- 3-axis MEMS accelerometer to detect motion
- Thermistor to detect skin temperature

### DESIGN | Lightweight and comfortable

- Discreetly sized - 115 x 36 x 8 mm, 11g
- Low profile, flexible, and water resistant
- Skin friendly hydrocolloid adhesive
- Integrated Sensor Module

### DURATION | Long life and fully disposable

- Battery life 96 hours (4 days)
- Disposable zinc air battery
- VitalCore™ processor inside
- Single patient use
